

**Data Sheet (DS) 7TM0319N**

**Issuing Date:** 2020-05-18

|              |  |
|--------------|--|
| Description  | MOP (non-phospho), $\mu$ -Opioid Receptor Antibody |
| Format       | Purified, Liquid                                   |
| Product Type | Rabbit Polyclonal Antibody                         |
| Isotype      | Polyclonal IgG                                     |
| Quantity     | 100 $\mu$ l  |

**Product Details**

|                       |  |          |
|-----------------------|--|----------|
| Applications          | This product has been reported to work in the following applications:  |          |
|                       |  | Dilution |
|                       | Western Blot   | 1:1000   |
|                       | Immunohistochemistry   | 1:100    |
|                       | Immunocytochemistry  | 1:200    |
|                       | <p>This information is derived from testing within our laboratories and peer-reviewed publications. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="https://7tmantibodies.com/7tm-antibodies-support/7tm-protocols/">https://7tmantibodies.com/7tm-antibodies-support/7tm-protocols/</a> Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.</p>   |          |
| Target Species        | Human, Mouse, Rat  |          |
| Product Form          | Purified IgG, liquid   |          |
| Antiserum Preparation | Antiserum to $\mu$ -Opioid Receptor was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.  |          |
| Immunogen             | A synthetic peptide with the sequence LENLEAETAPLP which is present in carboxyl-terminal tail of human, mouse and rat MOP.   |          |
| Storage Buffer        | Dulbecco's PBS, pH 7.4, with 150 mM NaCl, 0.02% sodium azide   |          |
| Specificity           | The non-phospho- $\mu$ -opioid receptor antibody is directed against the distal end of the carboxyl-terminal tail of mouse, rat and human MOP. It detects selectively the canonical form of MOP and none of the putative splice variants. It can be used to detect total MOP receptors in Western blots independent of phosphorylation. The non-phospho-MOP antibody can also be used to isolate and enrich $\mu$ -opioid receptors from brain lysates. It also detects MOP in cultured cells and tissue sections by immunohistochemistry. The non-phospho-MOP antibody has been validated using knockout mice (KO-Validated). |          |
| Guarantee             | 12 months from date of dispatch  |          |

|                               |   |
|-------------------------------|---|
| Storage                       | Store at -20°C.<br>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody.  |
| Regulatory                    | For research purposes only  |
| Health and Safety Information | Material Safety Data Sheet documentation is available at <a href="https://7tmantibodies.com/7tm-phosphosite-specific-antibodies/opioid-receptors/opioid-receptor-mop/45/mop-non-phospho-opioid-receptor-antibody?c=86">https://7tmantibodies.com/7tm-phosphosite-specific-antibodies/opioid-receptors/opioid-receptor-mop/45/mop-non-phospho-opioid-receptor-antibody?c=86</a> in the downloads section as:<br><a href="#">Safety Data Sheet EU</a><br><a href="#">Safety Data Sheet US</a> |
